

MY LITTLE GIRL'S STORY

My little girl started off in the foster care system when she was three years of age. After many previous placements, she came to live with me at age four. She had many extreme issues and multiple problems which needed addressing.

With a lot of love and attention and hard work, by family members and professionals, she was able to turn things around. We adopted her on her sixth birthday. She continues to have issues but with all of her hard work we call her our miracle child.

We love her very much and have never regretted adopting her.
